

Prestashop Restore Deleted Data

Do you want to recover the entities you have deleted?

Then Prestashop Restore Deleted Data can do this job for you. A backup of deleted products, categories, brands, suppliers, customers, features, and attributes gets created in the back office so that you can restore it with a single click.

Check the overview of the plugin in the video mentioned-below –

<https://www.youtube.com/embed/oBDa2U4BHw0>

Features

Admin can restore the deleted products, categories, brands, suppliers, customers, attributes, and features.

Option to restore the entities with new IDs.

Admin can restore the parent category along with its child categories.

Choose to restore the child categories in the root category in case the parent category does not exist.

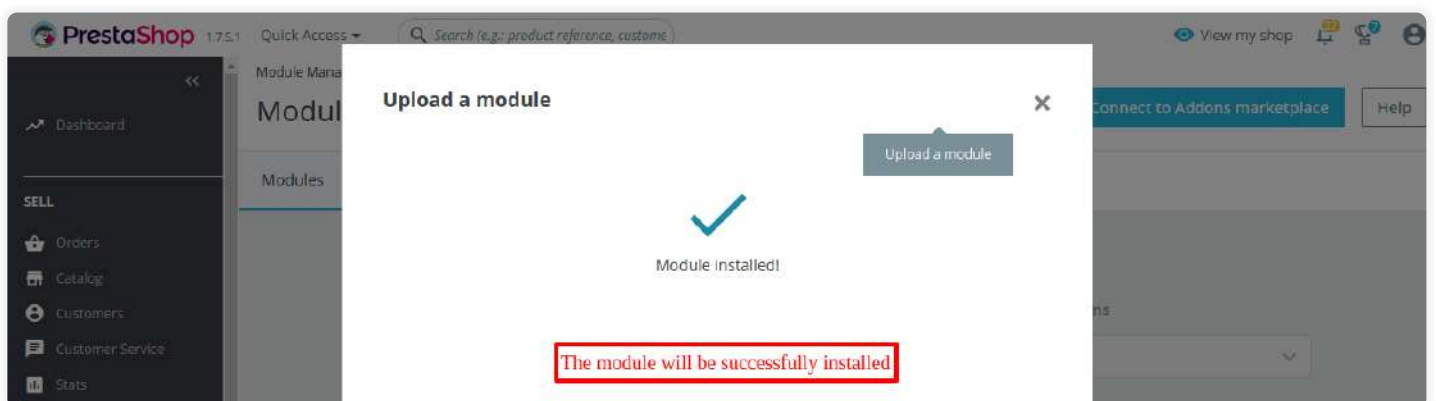

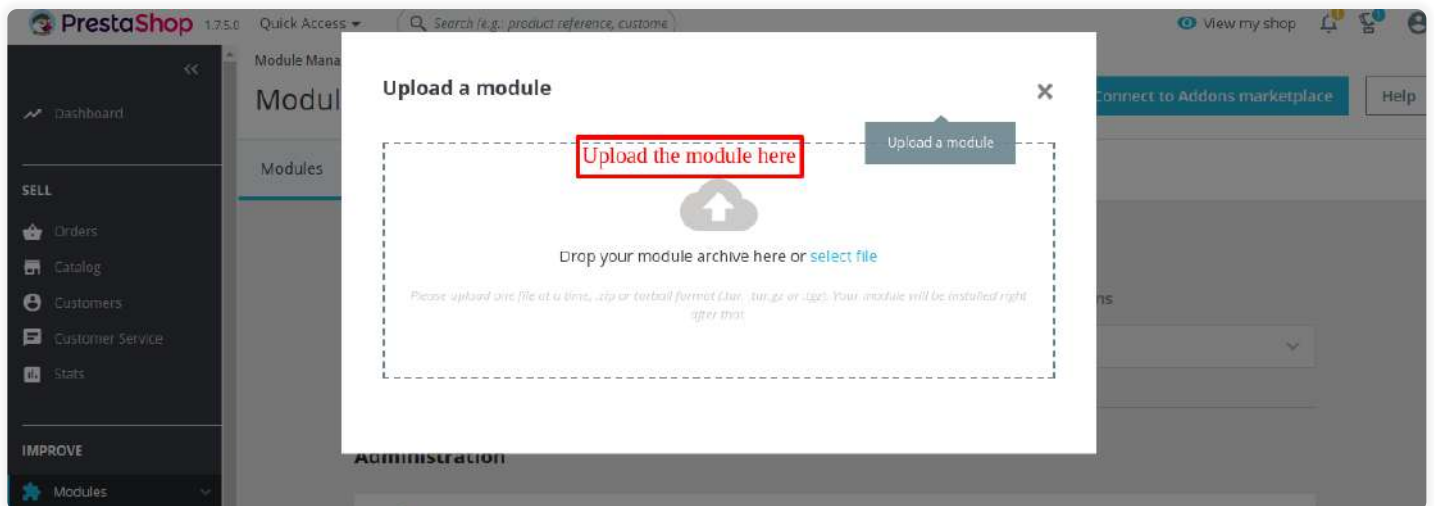

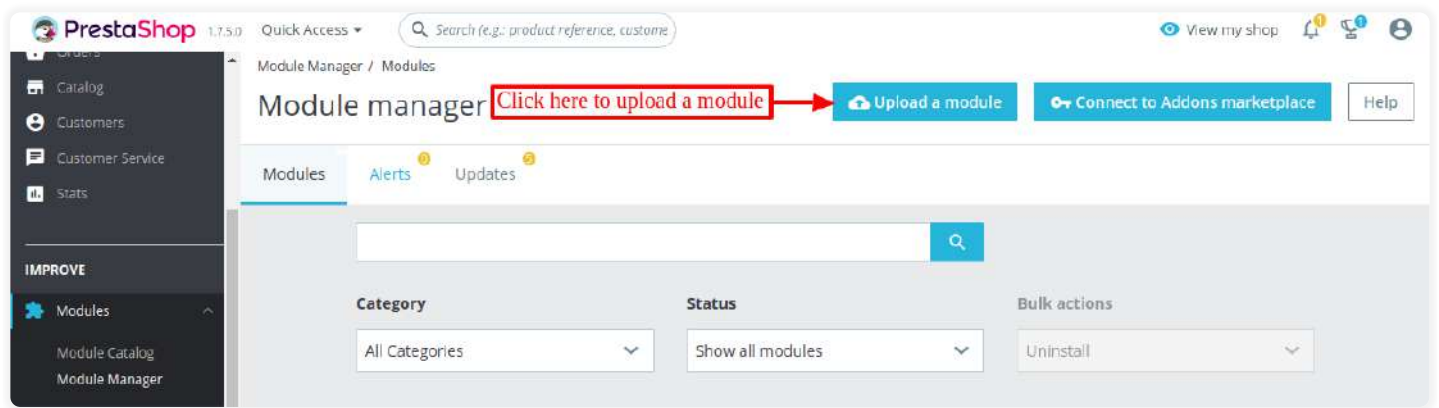

Admin can apply category, brand, supplier, feature(s), and attribute(s) on product upon restoration.

Admin can view all the entities he has restored under “Entity Restore History” tab.

NOTE: This module restores features and not feature values.

Installation

1. Go to back office ->modules.
2. Upload the module zip file.
3. The module will install automatically.

Module Configuration

After the successful installation of the module, admin can configure the module settings.

Settings

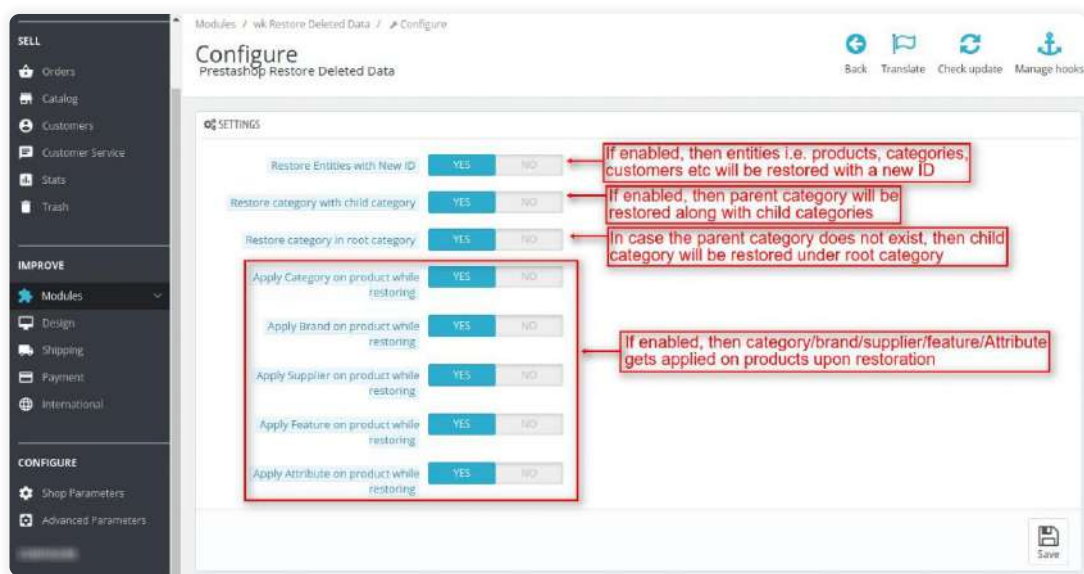

Under Settings, admin can enable/disable the restoration of

Entities with new ID,

Category with child categories,

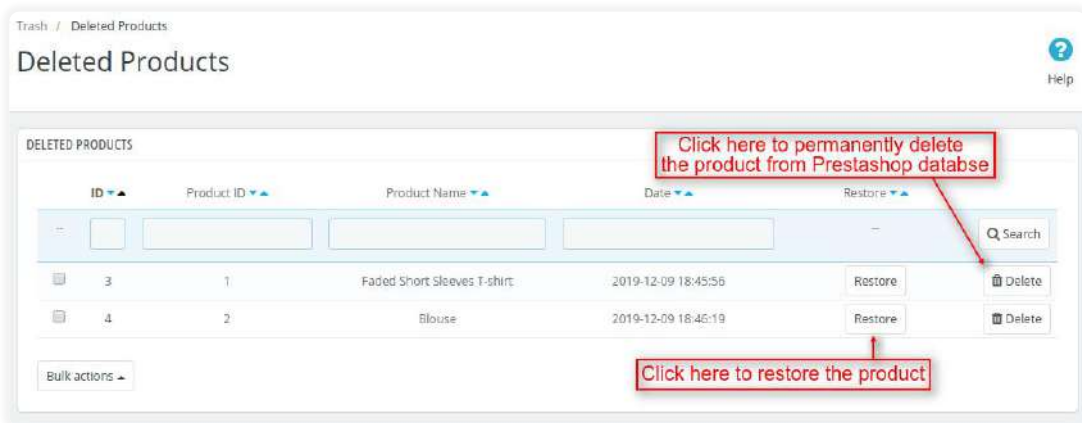

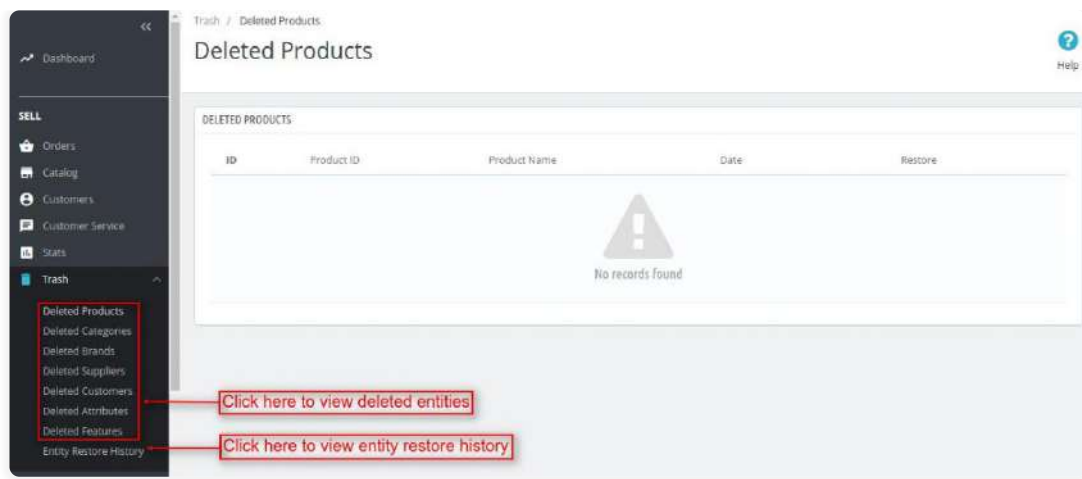

Category under root category

Admin can also choose to apply category, brand, supplier, feature, and attributes on product upon restoration.

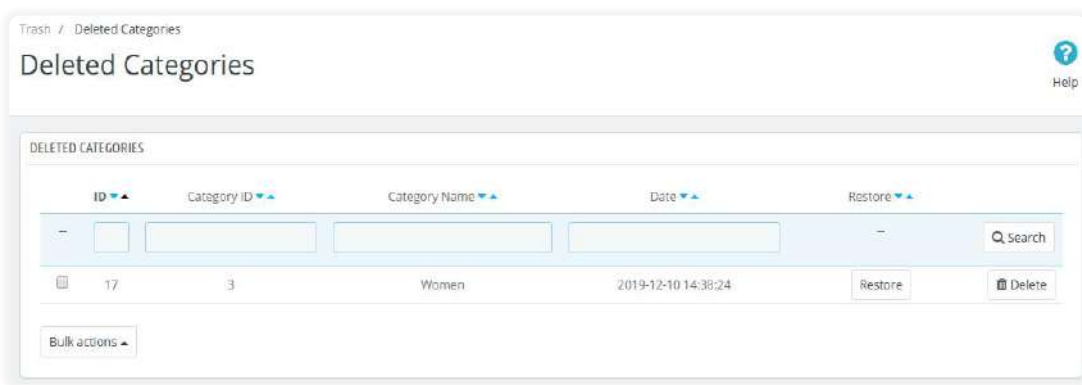

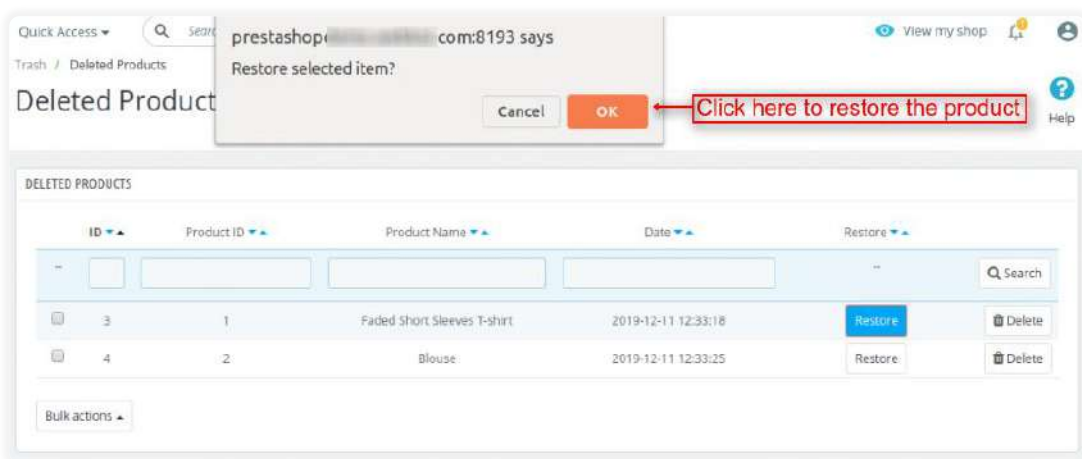

After the installation of the module, a new “Trash” tab will display where admin can view all the deleted products, categories, brands, suppliers, customers, attributes, and features.

Suppose admin has deleted some products, categories, brands, suppliers, attributes, and features.

When admin clicks on the “Restore” button, a popup appears on the screen asking to restore the selected entity as shown below:

Restore Entities with New ID

Deleted entities(products, categories, brands, suppliers, customers, attributes, and features) will be restored with a new id if enabled by admin.

Now, when admin restores all these entities in Prestashop database then these entities will be restored with new ids.

3	Fashion Manufacturer	manufacturer	manufacturer	10154	New York	United States

Similarly suppliers, attributes, customers, and features will also be restored with a new ID.

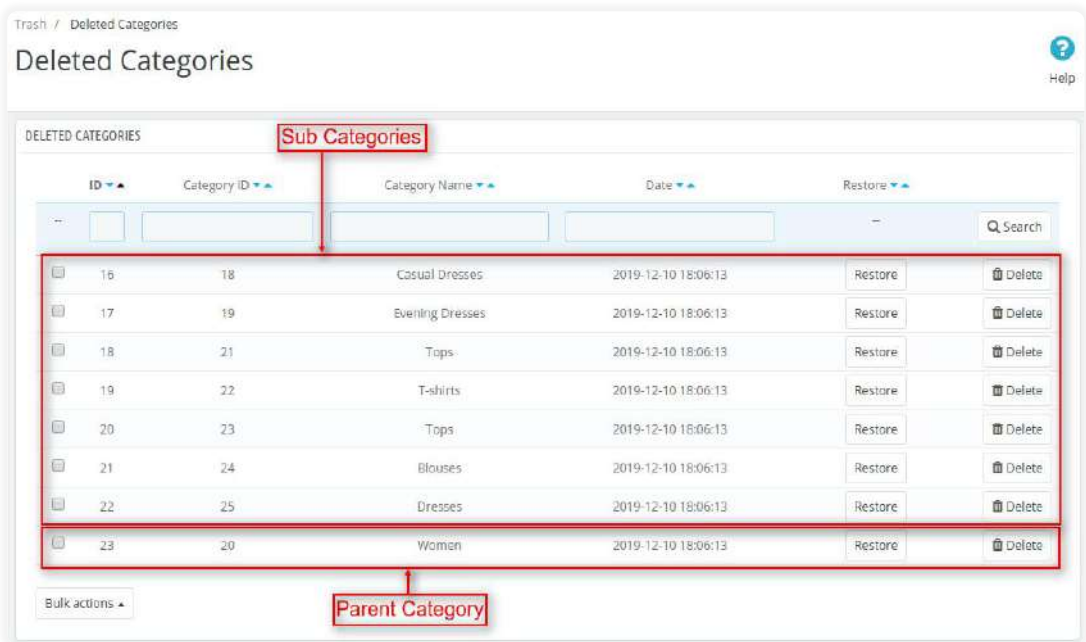

Restore category with child category

If enabled, then parent category will be restored with its child categories.

Restore category in root category

In case if the parent category does not exist, then it's subcategories will be restored under the root category.

Suppose admin has permanently deleted the parent category “Women” and restored it’s subcategories. All the subcategories will now restored under root category i.e. home.

Group access

ID	Group name
1	Visitor
2	Guest
3	Customer

 You now have three default customer groups.

Visitor - All people without a valid customer account.

Guest - Customer who placed an order with the guest checkout.

Customer - All people who have created an account on this site.

 Save

If disabled, then restoring subcategories will not work.

Apply Category/Brand/Supplier/Feature/Attribute on Product While Restoring

If enabled, then deleted entities will apply to the product upon restoration.

The screenshot shows a product management interface for a "Faded Short Sleeves T-shirt". The interface includes a top navigation bar with tabs for "Basic settings", "Combinations", "Shipping", "Pricing", "SEO", and "Options". The "Basic settings" tab is active, displaying a product cover image, a description, and various configuration options.

Annotations with red boxes and arrows highlight specific features:

- Compositions:** A red box highlights the "Compositions" section, with a note stating: "Compositions" feature not applied to product as it has been deleted by admin.
- Brand:** A red box highlights the "Add a brand" button, with a note stating: Brand and Category associated to a product have been deleted by admin.
- Categories:** A red box highlights the "Associated Categories" section, showing a list of categories with "Home" selected. A note states: Brand and Category associated to a product have been deleted by admin.

The interface also includes sections for "Price" (Tax excluded: \$ 16.5100k, Tax included: \$ 16.51), "Features" (Styles, Properties), and "Categories" (Search categories, Associated Categories, Create a new category).

Manage your product combinations

Attribute group "Size" not applied to product as it has been deleted by admin

To add combinations, you first need to create proper attributes and values in **Attributes & Features**. When done, you may enter the wanted attributes (like "size" or "color") and their respective values ("XS", "red", "all", etc.) in the field below, or simply select them from the right column. Then click on "Generate": It will automatically create all the combinations for you!

Combine several attributes, e.g.: "Size: all", "Color: red".
