

Installation and User guide for „Text block in header“ module for Prestashop 1.7

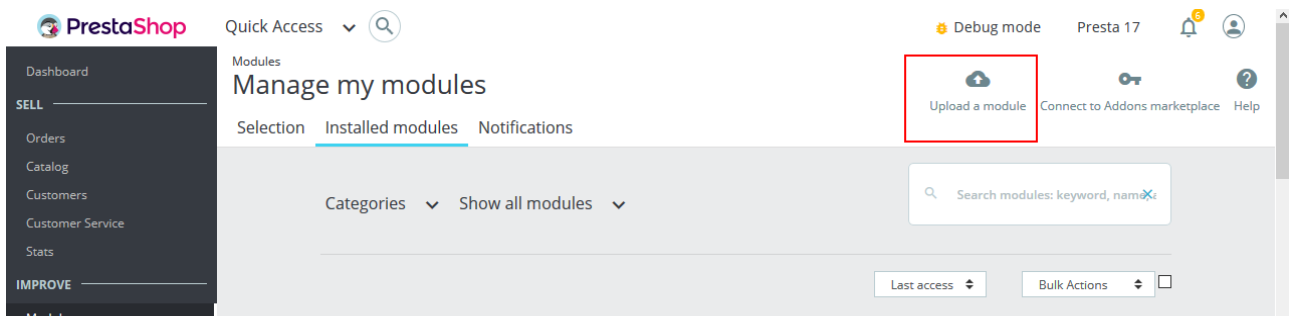

Thank you for purchasing my module. If you have any questions that are beyond the scope of this help file, please feel free to contact me. If you purchased the module via Prestashop addons, you can send me an email via „Contact the developer“ link from addons product page.

To install this module, you must have a working version of Prestashop 1.7 already installed.

Module installation

1) In Prestashop administration, go to „Modules and Services“ tab and click on "Add a new module".

2) Select ZIP file wpheadertext.zip and click on "Upload this module".

3) Module "Text block in header" will appear in list of modules, click on "Install" button.

(if you don't have zip library enabled on your server, you can also copy the unzipped folder "wpinfopanel" to "modules" directory on your FTP. Then go to Back Office > Modules, find "Text block in header" and click "Install").

Module setup

Go to **Back Office > Modules**, find „Text block in header“ module and click „Configure“. The module provides following options:

Header text content – use TinyMCE editor to enter any content (text, images, embedded video...)

Image – Click „Browse“ to upload the image (optional, you can upload image via editor too).

Image link – you can setup link for the uploaded image.

Header block background – background of whole block (default is green - #16A085).

Header block bottom border color – bottom border color. You can setup same color as background or some contrast color (bit darker then background).

Close icon color - setup color of close icon (top right corner) using color picker.

Close icon background – setup background color of close icon. Default color is #16A085 to match the background color.

Close icon color on hover - default color is #ffffff

Close close icon background on hover - default color is #16A085.

Button background - background color of button inserted via editor (see section „Tips“). Default #2e8ece

Button text color - text color of button inserted via editor. Default #ffffff

Button background on hover

Button text color on hover

Display on mobile – choose if you want to display the info panel on mobiles (smaller than 480px).

Enable Google fonts? - if you keep it disabled, module will not load the Google library (your theme may already use it).

Google font url – see tips for more details how to get the link

Google font family - see tips for more details how to get the font-family

Tips

Change text color

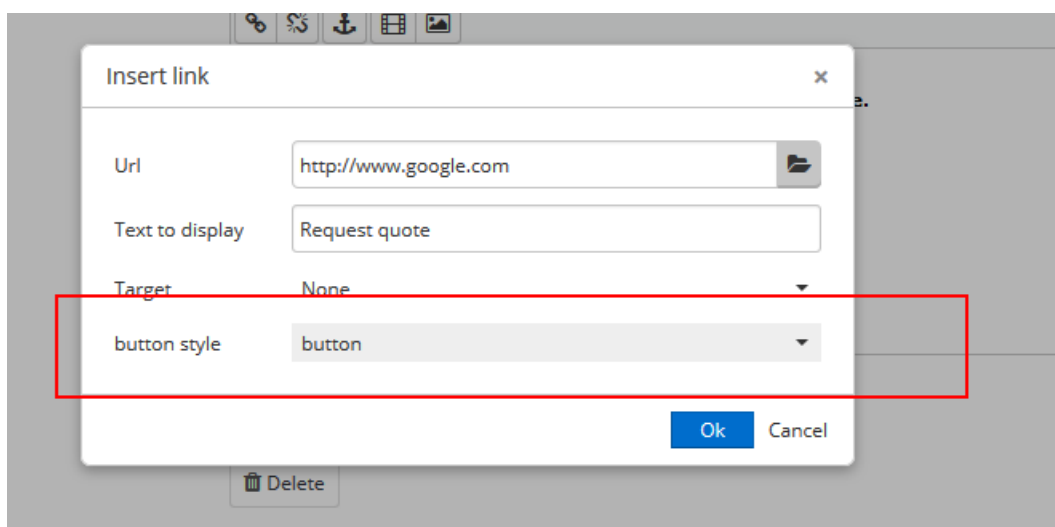

Select text and change it's color. Click on „Text color“ to setup color on text (not background).

Insert button into the editor

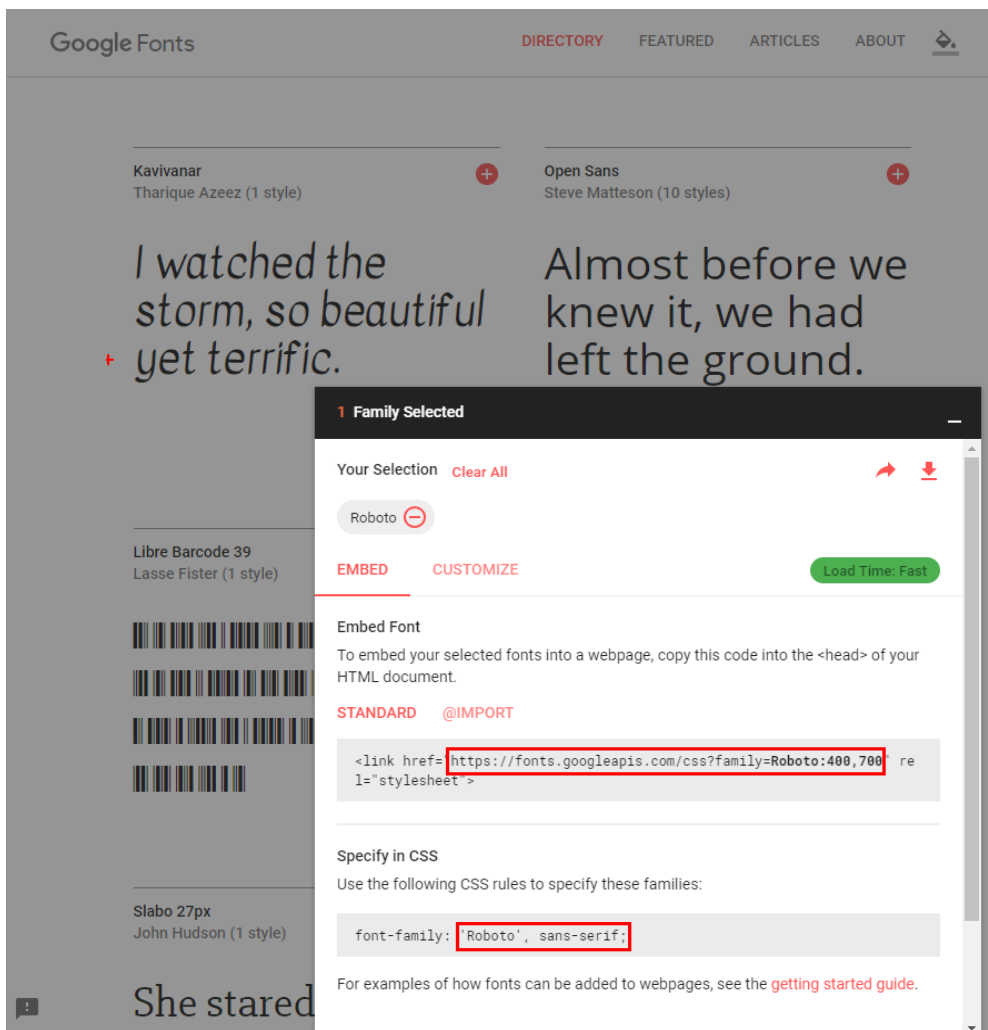

- 1) Insert text of the button and select it, then click on button „Insert/edit link“
- 2) Enter the URL (link) and select „button“ in „button style“ field

You can change the styling of the button seen by customer via settings in configuration screen of module (Button background, Button text color etc.)

How to get Google font links

Visit <https://fonts.google.com/> select your font and then copy these details into „Google URL“ and „Google font family“ fields in module configuration:

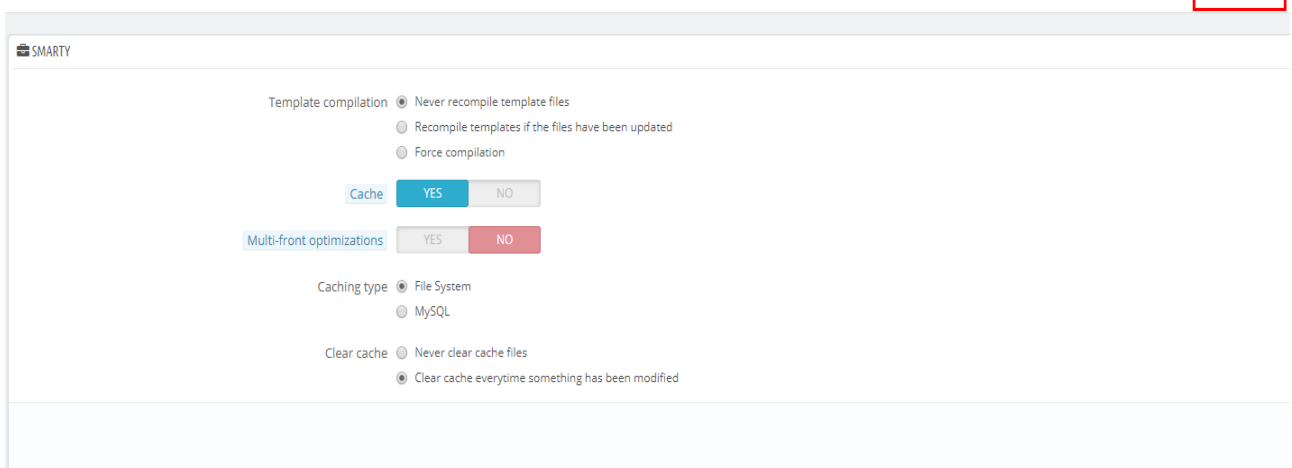

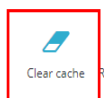

If you made changes in settings and they are not visible on website

- you may need to clear smarty cache:

Advanced Parameters / Performance

Performance

- and also clear your browser cache (Shift + F5 twice).
